

2019 Editorial Calendar

MONTH	TOPIC
January Early	Vision's Impact on the Life Sciences Industry
January Late	Cloud Integration for Machine Vision
February Early	The M&A and Funding Landscape for the Machine Vision Industry
February Late	Embedded Vision: What's New for 2019?
March Early	Vision & Related Automation Standards Update for 2019
March Late	3D Eye Tracking Applications & Opportunities
April Early	Machine Vision Lighting & Optics Update: Mastering this Critical Part of Your System
April Late	Deep Learning Software Update
May Early	The System Integration Landscape for Machine Vision: What are Customers Looking for in 2019?
May Late	A New Age of Identification: Deep Learning, 3D and More
June Early	IR, UV, Multispectral, Time of Flight & Other Non-Visible Imaging Techniques
June Late	Maximizing Your Machine Vision ROI
July Early	New Developments in Vision Guided Robotics
July Late	Building Smart Cities with Machine Vision
August Early	The Startup Landscape for Vision: What is New and Emerging?
August Late	Changing the World with Artificial Intelligence & Machine Vision
September Early	New Drone & UAV Applications for Machine Vision
September Late	Cloud, Edge, Fog... What Does It All Mean from a Machine Vision Context?
October Early	ADAS Systems & Autonomous Vehicles: The State of the Industry
October Late	Vision's Critical Role in the Booming Warehousing & Distribution Industry
November Early	Machine Vision and Consumer Electronics in the Home
November Late	Component & Smart Camera Technology Update
December Early	Augmented & Virtual Reality Applications for Vision Technology
December Late	Using Vision to Transform the Retail Experience

**Editorial calendar is subject to change.*

2019 WEBINAR SERIES

MONTH	TOPIC
January	The Intersection of Machine Vision, Collaborative Robots & AI: What You Need to Know
February	Smart & Component Camera Technology Deep Dive
March	A New Age of Identification: Deep Learning, 3D Vision, and More
April	Machine Vision Lighting & Optics Update: Mastering this Critical Part of Your System
May	ADAS Systems & Autonomous Vehicles: The State of the Industry
June	Embedded Vision Update: What's New
July	The Evolving World of Vision Guided Robotics
August	Emerging 3D Vision Technologies: Time of Flight, Active/Passive Imaging Options
September	Cloud Integration for Machine Vision
October	Vision Solutions for the Electronics & Semiconductor Industry
November	New Machine Vision Software Solutions
December	Vision Solutions for the Retail Industry

**Editorial calendar is subject to change.*
